

airscreen Mobile™

Enjoy live TV without using mobile data

IDLA-DON01-IOSOU-OGW

Item: 5979

airscreen Mobile™ is a compact wireless gateway device that lets you watch free-to-air HD TV anywhere you go using your iOS phone or tablet. It complies with the DVB-T/T2 standards and the TV signals are received off air so no internet connection or any subscription is required. The airscreen Mobile™ app connects to the gateway device over WiFi and offers an intuitive user experience with an easy and quick setup and an exciting array of features including Electronic Program Guide (EPG), program information, recording of free-to-air TV shows and storing on your mobile device, automatic TV channels search, creation of favorite channel list and playback of your recorded TV shows. Its ultra compact design and low power consumption makes it highly portable and ideal to use whenever you are on the move. Visit the App Store, download the free airscreen Mobile™ app to your iOS device and connect to the WiFi access point of your airscreen Mobile gateway device. Launch the app and follow its setup wizard to start enjoying live TV quickly and easily.

Key features

- Watch free-to-air DVB-T/T2 live HD TV on iOS phone/tablet
